

# MAKE "BORING" SUBJECTS ENJOYABLE

## Make a survey!

At the beginning of the school year make a survey to find out what your students would like to learn about. Throughout the year, try to incorporate their ideas in your lessons.

## Use games!

We all know children like to play. Adults do, too! Try to incorporate games or quizzes in your lessons and use them as assessment or revision tools.

## Role-play!

Give your students a chance to be teachers. Assign them to prepare presentations, quizzes or tasks for their classmates. This will make them feel in charge and make them more motivated to study and prepare lesson materials.

## Make students work!

Prepare additional materials for fast finishers or make materials more simple for those who have problems. If students have work to do and feel in charge of their learning they will enjoy lessons more.

## REMEMBER!

Each subject is different! Each class is different! Don't be afraid to experiment and try out different strategies to find the one that suits your and your student best.
